QA Analyst experienced in testing web, mobile and connected TV applications, from functional and API testing to building test automation with Puppeteer, WebdriverIO and BrowserStack. MSc Computer Science graduate who builds practical tools in JavaScript and Python. Collaborative and detail-focused, working closely with developers to find root causes and deliver on time.

Work History

2022-10 - Present

QA Analyst

FX Digital, London

- QA steer on the majority of internal projects, with a primary focus on the video player.
- Contracted out as QA to an external team working on ITVX.
- Deploy builds and execute tests across Web, Mobile and Connected TV devices.
- Write automated tests in Gherkin on an in-house Puppeteer framework, and automate real-device testing on BrowserStack with WebdriverIO.
- Deliver feature requests and internal changes with a strong focus on test coverage, tooling and collaboration.

2020-08 - 2021-08

Associate Analyst (QA)

Deloitte USI, Mumbai

- Functional and operational QA tester on a Government and Public Services project.
- Scripted test scenarios, executed test cases and performed API testing with SoapUI.
- Logged defects and worked with developers to find root causes and understand change requests; shared findings with senior management to establish best practices.
- Completed Deloitte's certification course in Integrated Eligibility.

Education

2021-09 - 2022-09

MSc Computer Science

Queen Mary University of London - London, England

- Studied Machine Learning and Bayesian Networks. Dissertation used logistic regression, random forest and Elo ratings to predict end-of-season NBA seeds.

2017-06 - 2020-07

BSc Computer Applications

CHRIST University - Bangalore, India

- Member of the University Basketball Team.
- Built Inbound, an Android app in Java connecting Bangalore's basketball community with local match times and scores.

Accomplishments

Recorded audiobooks for visually impaired children as part of a Deloitte initiative with the Samarthanam Trust for the Disabled.

Interests

Sports prediction using machine learning, test automation, basketball and bouldering
